

PROJECT MR

All progress up until this point has been self-funded. The hardware side of MR has been mostly solved and I'm currently working on the software that will be the core of the experience. I want to be able to keep working on MR full-time but in order to do that I need to be able to support myself and my family financially while also having enough to afford hardware for research and .testing

This is where you come in! If you believe in my vision and would like to see MR become a reality please consider supporting the campaign! The goal is $30,000 to do all the things I'd like to but the goal is flexible and every cent will be used to push MR as far as I can. The campaign page will also be updated with progress reports as well as media showcasing the development of the .project

Although the project is still in the R&D phase, I promise to make investing at this stage very much worth your while. By supporting MR now you are helping the project mature, preparing it .for the next fundraising milestone and it's launch. Without you, there is no MR

- .Early Backer Badge visible in game – $25
- .Day pass to MR – $50

Reminder: MR is in active development. When MR launches please come by and redeem your .perks! If all things go well, this should be soon. Thank you for your patience
