

REACH OUT AND TOUCH

One of the days I would go out and interact with different people as I reach out to them. Life is surely really hard but if we can heal their world by providing with them the little basics we can offer, their world will be filled with love and joy. From the funds goal requested, I intend to use it for needy students, reaching out to street kids and the aged not forgetting orphans. My goal is to rent a house and look after such people, help them get education, good health and a wonderful Life by this year. I'm so passionate about this as it has been a goal since I was a child
